

Setty DVBT-T2 HEVC STDK-01 decoder

GSM114243
5900495963741

Setty STDK-01 is a handy and universal receiver providing access to digital terrestrial television broadcast in the DVB-T2 standard in high definition. The setup process is quick and simple, and the decoder itself is extremely easy to use. The set includes a remote control that improves navigation, along with matching batteries, and a Polish/English-language manual. The Setty STDK-01 decoder has a number of useful functions, including channel editing, program recording, parental lock, language and timer change and a WiFi connection ability thanks to the USB connector. Watch your favorite TV shows with great image and sound quality.
