The Color Chrome cover series stands out with an increased thickness of 1.5 mm and a metallic finish! The TPU material used and the thickness of the cover guarantee better protection for the phone against shocks and scratches. The cover is fully transparent with a colored element on the edges, and thanks to the built-in lenses, it protects the phone's camera from scratches. An additional textured inner layer prevents moisture accumulation and the cover from sticking to the smartphone casing. The Color Chrome series features necessary cutouts for all ports and embossed areas for buttons. - The cover minimally increases the size of the smartphone. - It can be successfully used with car mounts. - It allows for wireless charging of the phone with a MagSafe charger. Please note that a natural property of TPU material (thermoplastic polyurethane) is the darkening process. This occurs after prolonged use or contact with dyes. High exposure to sunlight also causes discoloration.

## Specification
