Car Charger for Built-in Installation with Output: USB-A 5V/2.1A + USB-A 5V/1A, Input: 12V/24V. High-quality universal car charger designed for installation. The dual USB socket allows charging two devices simultaneously, solving the issue of using any splitters, e.g., when charging a phone while using GPS navigation. The device is equipped with a blue LED indicating the operation of the charger. It can be powered by both 12V and 24V, making it suitable for use in passenger cars, vans, trucks, boats, motorcycles, etc. Solid construction, aesthetic finish, and the highest quality materials used in production ensure a long, trouble-free lifespan. The overall product offers a reasonable price-to-quality ratio. All these features make this product capable of satisfying even the most demanding users, guaranteeing them satisfaction and safety of use. Power Supply Voltage 12 / 24V DC Output Voltage 5V DC USB Current 1 1A USB Current 2 2.1A Mounting Part Diameter 29mm Maximum Diameter 37mm Frame Dimensions 60x43mm Length with Connectors 50mm Length without Connectors 41mm Operation Indicator LED Color Black

Specification

Connector: USB-A (female)
Output voltage: 5 V
Colour: black
Brand: LTC
Warranty: 24 month
