AFD601

AFD601 is a top quality, multifunctional fat-free fryer, with which you can easily prepare delicious, crispy outside and soft inside fries, as well as seafood, meat or vegetables. With its frying, baking, grilling and heating functions, AFD601 will be your indispensable kitchen assistant when preparing a variety of dishes. It will also prove indispensable in the kitchen of those of us who care about healthy eating and minimising the amount of fat used to prepare everyday meals for the whole family. In addition, the operation of the fryer is very simple and quick, so in just a few moments we can prepare a wholesome meal for our loved ones. Air fryers are characterised by very low oil consumption, which means that we use much less oil to prepare meals than when frying e.g. traditional Chips. Until now, lovers of Chips and other fried dishes had to reckon with the unpleasant health consequences of their culinary tastes. In addition, oil is usually used repeatedly, which has a very negative impact on its properties. With the AFD601 deep fryer this problem is a thing of the past. Thanks to the use of very little fat and easy cleaning of the device you are sure to reduce the harmful effects of this dish on your health to a minimum. In addition, the air fryer produces much less smoke and odour compared to conventional air fryers. The AFD601 air fryer works by using a vortex of warm air to ensure your food is heated evenly. The fryer's aluminium cooking chamber and 2.5 litre basket are coated with DuPont Teflon®, which guarantees food not sticking to its surface and makes it much easier to clean and maintain. No more scraping off clinging fat. Specially designed separator allows you to prepare two dishes at the same time, e.g. Chips and chicken cutlet or vegetables. The high grate will make it easier to arrange several layers of food and will ensure proper air circulation between the fried ingredients. Everyone can cook something according to their own tastes. Nowadays we pay attention to the fact that the appliances which will be placed in our kitchen interiors are not only functional, but also match our style, e.g. cabinets, countertop. A definite advantage of this fryer is its appearance. Elegant, minimalist design is a choice for connoisseurs who, in addition to unparalleled quality and top performance of the appliance, also value its appearance. The combination of universal white with a steel panel will be the perfect complement to any modern kitchen. The fryer has a large, easy to read LCD display, giving the temperature and heating time. Below it there are convenient buttons for switching the device on and off, setting the time (max. 1 hour) and temperature (from 150 to 200°C) as well as the operation mode of the fryer. The set includes accessories: a separator and a high grate.
