

Slim case 1 mm for Google Pixel 8a transparent

GSM178433
5907457715059

Classic transparent smartphone covers offer universal and aesthetic protection, and the Slim series made from flexible TPU stands out for its abrasion resistance. Slim 1 mm is a lightweight and flexible case with a thickness of just 1 mm, perfectly fitting the device without increasing its weight or size, and precise cutouts ensure comfortable use. The cover does not interfere with wireless charging, is suitable for printing, protects the smartphone from damage, and allows safe use with car mounts. The interior is protected against sticking and moisture accumulation; however, prolonged exposure to intense sunlight is not recommended, as UV radiation may negatively affect the product's appearance.
