

Maxlife MXCH-12 is a magnetic car holder designed for convenient and safe use of your phone while driving. Mounted to the air vent, it allows for quick and stable installation of the device without the need for complicated mechanisms. The minimalist black design makes it perfectly blend with the interior of any car. Thanks to the movable head, the holder enables free adjustment of the phone's angle, ensuring optimal screen visibility. A strong magnet guarantees secure hold of the device even on uneven roads. The package includes two metal plates that can be attached to the phone or case, providing full compatibility. This practical accessory combines functionality with an elegant appearance. It is effective both during daily commutes and longer trips. Maxlife MXCH-12 makes it easier to use navigation, conduct hands-free calls, and ensures safety while driving.
