Shine are classic transparent phone cases with a touch of glitter. They are a universal and aesthetic type of protection. The products made of TPU material look great thanks to the thicker frame. The Shine series features cases with a thickness of 2 mm. The lightweight and flexible product is perfectly fitted to the device. The cases do not increase the weight or size of the smartphones. The embossed areas for buttons and precise cutouts for ports facilitate phone usage. • Shine 2 mm case does not interfere with wireless charging; • the product is suitable for printing; • protection of smartphones from damage; • safe use with car mounts; It is not recommended to expose the cases to intense sunlight for a long time. Exposure to UV radiation negatively affects its appearance.
