

## Safepop case with strap for iPhone 16e / 17e purple

GSM275749  
5907674545545

The SafePop cover is a durable case with a hybrid design made of TPU and polycarbonate, effectively protecting the smartphone from the effects of drops and impacts. Reinforced corners, raised edges around the screen and camera, and a thickness of 2.3 mm enhance the device's safety on a daily basis. The model also features openings for a keychain and strap, as well as a nylon wrist strap, improving convenience and reducing the risk of dropping the phone. The frosted, semi-transparent back minimizes the visibility of fingerprints and minor scratches, while precise cutouts and button covers ensure comfortable use.

### Specification
