LXSAT401

SAT SINGLE LTC BLACK converter is a full-range device, designed to receive satellite programs, broadcast in vertical and horizontal. Ideally suited for reception of digital high-definition HD television. The device works perfectly with all available receivers on the market. It has a proven protective system, which avoids damage to the connectors by accumulated water. This allows to significantly extend the lifetime of the device. The minimised noise factor enables optimum signal reception, even in extreme conditions. This guarantees a smooth free from any interference even under difficult weather conditions. The highest quality materials and high manufacturing precision guarantee trouble-free operation of the device and user satisfaction.

Specification

Working temperature: -40 ° C ... 65 ° C
Noise figure: 0.1 dB
Lower output frequency range: 950 - 1950 MHz
Upper output frequency range: 1100 - 2150 MHz
Upper input frequency range: 11.7 - 12.75 GHz
Lower input frequency range: 10,7 - 11,7 GHz
Local oscillator lower frequency range: 9,75 GHz
Local oscillator upper frequency range: 10,6 GHz
Reinforcement: 60 dB
VSWR: 2.5:1
Warranty: 12 month
