High Definition Series DisplayPort Cable - DisplayPort 5m long. Supports standard 1.4 and resolution 8K/60Hz Specification: - DP1.4 - bandwidth of up to 32 Gb/s. - Dynamic HDR allows for rich color depth and a wide range of brightness. - Compatible AMD/NVIDIA graphics cards support G-Sync and advanced technologies Free Sync, FEC, and DSC. - Ideal for everyday use Parameters: - Model: Baseus High Definition Series DP 8K to DP 8K Adapter Cable 5m Cluster Black - Color: Black - Length: 5m - Bandwidth: 32 Gb/s - Support for: HDR+ - Resolution: 8K 60Hz, 4K 120Hz/144Hz, 2K 240Hz/165Hz - Version: 1.4 - Manufacturer code: B00633706111-04 Key advantages: - DP port supports video resolutions up to 8K 60Hz. - Ensures stable image transmission. - Button on the connector prevents loosening or falling out of the port. - Supports HDR. - Bandwidth of up to 32 Gb/s. - Greater contrast between bright and dark, more shading details, and improved 3D effects and gradation on images. - 12-bit color depth. - The external protective layer of the cable wrapped in PVC prevents fraying and protects the cable from daily wear and tear. - Professional and safe Plug & Play adapter (no drivers required). Cable finish: The cable features elegant and durable connectors that are resistant to wear and oxidation. Even after many connections, they will still smoothly and securely fit into the ports. The PVC material tightly wrapped around the cable provides additional protection, flexibility, and durability. The design helps reduce fraying and enhances longevity, allowing easy handling of everyday use. You don't have to worry that an accidental tug will render the entire cable useless. The most vulnerable point of any cable - the junction between the wire and the connector, has been additionally reinforced with flexible PVC.

Specification

Connector: DisplayPort (male)
Brand: Baseus
Colour: black
Warranty: 12 month
