AFD501

AFD501 is a high-quality, multifunctional fat-free fryer, with which you can easily prepare, among other things, delicious, crispy on the outside and soft inside fries. Additionally, the device has a frying, baking, grilling and heating function, which makes it your irreplaceable assistant in the kitchen when preparing various meat, fish or vegetable dishes. Air fryers are characterised by very low oil consumption, which means that we use much less oil to prepare meals than for example when frying chips in the traditional manner. Until now, fans of Chips or fried dishes had to reckon with the unpleasant health consequences of their culinary tastes. In addition, oil is usually used repeatedly, which has a very negative impact on its properties. This problem is now a thing of the past with the ADF501 deep fryer. Thanks to the use of very little fat and easy cleaning of the device you are sure to reduce the harmful effects of this dish on your health to a minimum. In addition, the air fryer produces much less smoke and odours compared to conventional air fryers. The AFD501 works by means of a vortex of warm air, ensuring your food is heated evenly. The fryer's aluminium chamber and basket are coated with DuPont's non-stick Teflon® coating, which guarantees that food does not stick to its surface and makes it much easier to clean and maintain. A definite advantage of AFD501 fryer is its appearance. Elegant black, minimalist design is a choice for connoisseurs who, in addition to unparalleled quality and top performance of the appliance, also value its appearance. This equipment will be a perfect addition to any kitchen. The fryer has a large, easy to read LED display giving the temperature and heating time. Below the screen there is a convenient to use touch panel, where you can turn the appliance on or off, set the time (max. 1 hour) and temperature (from 150 to 200°C) and the operation mode of the fryer.

## Specification

- Type of product:** deep fryers
- Working temperature:** from 150°C up to 200°C
- Brand:** Blaupunkt
- Functions:** LED display
- Colour:** black
