SMS411

SMS411 by Blaupunkt is a high quality sandwich maker, thanks to which your toast will always be perfectly cooked. The appliance's hot plates, coated with a non-stick coating without PFOA (perfluorooctanoic acid), will give them a triangular shape that will appeal to children, in particular. They will also ensure that the toast does not burn. With the help of SMS411 you can prepare up to 4 triangular sandwiches at the same time, which will satisfy the appetite of even the biggest hunger. An effective heating mechanism ensures even toasting. An automatic thermostat ensures that the toasting temperature is maintained to ensure that the sandwiches are crispy on the outside and soft enough on the inside. The SMS411 housing is properly insulated and does not heat up during operation, so it is friendly to younger and less experienced users who can also help in preparing a meal. To achieve the best toasting result and for the safety of the user, during operation it is possible to close the device using a clamp placed on the handle. The indicator lights clearly indicate whether the sandwich maker has reached the optimum temperature for making the perfect sandwiches.

Specification

Type of product: toasters and toaster ovens
Power: 750 W
Brand: Blaupunkt
Input voltage: 220-240 V~ 50/60 Hz
Warranty: 24 month
