BO-CDA239

The BWOO GaN 45W PD charger with two USB-C ports enables fast charging of two devices simultaneously. When using one port, it offers power up to 45W, and when using both, it intelligently distributes it to 25W + 20W. GaN technology ensures high efficiency in a compact case, and the smart PD protocol automatically adjusts the charging parameters. Multi-level protections, an NTC temperature sensor, and a fireproof PC case ensure safe use at home, in the office, and while traveling.

Specification

Input voltage:	110 - 240 V (50 - 60 Hz)
Output voltage:	5V-3A; 9V-3A; 15V-3A; 20V-2.25A
Product dimensions (mm) length x width x height:	91x36x42 mm
Brand:	BWOO
Cable in set:	no
Warranty:	12 mc
