HAMMER Watch Plus is a durable, outdoor smartwatch with a GPS system - a new, improved generation of the HAMMER Watch. For even more enjoyment of activity and reliability in training, this smartwatch is equipped with a solid construction with IP68 certification, precise GPS navigation supported by 3 satellite systems, health monitoring functions, AMOLED screen and even more sports modes. Aim high and push the limits! Control your watch with a touch screen and be on keep up with your achievements. Thanks to AMOLED technology, 1.35" display with a high resolution of 390x390 px, looks better and data reading is easier. The screen has more vivid colors, a wider color gamut, and at the same time is distinguished by lower energy consumption. Operate with faster and more accurate GPS measurements. The new HAMMER Watch Plus will take you to an even higher level thanks to the fact that navigation is supported by 3 positioning systems: GPS + Beidou + GLONASS. This means even more detailed measurement and more accurate results. The watch also offers an electronic compass, which is an additional advantage. HAMMER Watch Plus also means safety and health support. Thanks to the watch, you can "test your condition" all day long: monitor your heart rate, analyze your sleep and blood oxygen levels (SpO2). It is an effective way to regenerate and monitor health. You can also track calories burned and steps taken.
