Maxlife Children's Watch MXKW-350 The MXKW-350 Maxlife watch not only facilitates communication between parents and children but also offers a range of features designed for safety, education, and entertainment. It is a tool that helps parents maintain close contact with their child while providing entertainment and security. The watch has many useful functions for both parents and children. Smartwatch Full of Possibilities- Calls and Video Calls: Parents can communicate with their child using the call and video call features. - Phone Book: A simple and intuitive phone book allows the child to save contact numbers of important people. - Accurate Location: The watch enables precise tracking of the child's location both outdoors and indoors. - Safety Zone: Parents can designate a safe area for the child. If the child leaves this zone, they will automatically receive a notification. - Route Tracking: The watch records the route the child has taken, allowing parents to monitor their activity. - Remote Voice Monitoring: Parents can remotely listen to the child's surroundings. - Pedometer: The integrated pedometer motivates the child to engage in physical activity. - Math Game: The watch offers a math game that develops logical thinking skills. - Calculator: A useful feature for learning and everyday tasks. - Chat Function: Children can communicate with each other, exchange messages, and connect in a safe, controlled environment. - Camera: The child can take photos and save them on the device. - "Do Not Disturb" Mode: During certain hours, such as during study time, parents can disable distracting features. - Gallery: The watch allows for photo storage. Additional Features The watch also has other additional features, such as an alarm clock, sleep monitoring, and the ability to locate it in case of loss. Compatibility and Battery Life The watch is compatible with Android operating systems 5.0 or newer and iOS 8.0 or newer. The smartwatch operates for up to 3 days without the need for charging. The MXKW-350 has a 600 mAh lithium-polymer battery, and charging is done via a magnetic cable. In the Box The package includes the Maxlife MXKW-350 children's watch, a charging cable, and a user manual.
