Buy now

The Anti Shock cover is an aesthetically pleasing high-quality product. The Anti Shock series features reinforced corners and an increased thickness of up to 1.5 mm. The TPU material used and the thickness of the cover ensure greater protection for the phone against shocks and scratches. The cover is fully transparent. An additional rough inner layer prevents moisture buildup and adheres the cover to the smartphone case. The Anti Shock series has cutouts for all ports and embossed spots for buttons. - The cover minimally increases the size of the smartphone. - It can be successfully used in car mounts. - It does not hinder the operation of wireless chargers and magnetic stickers. Please remember that a natural property of TPU (thermoplastic polyurethane) is the darkening process. This occurs after prolonged use or when in contact with dyes. High exposure to sunlight also causes discoloration.

### Specification
