

Slim case 2 mm for Samsung Galaxy A57 5G transparent

GSM196815
5907582348894

Classic transparent phone covers are a universal and aesthetic type of protection. The Slim series consists of high-quality products made from TPU material. This is a type of flexible plastic that is abrasion-resistant. The Slim series includes covers that are 2 mm thick. The product fits perfectly in the hand and looks solid on the smartphone. The slightly reinforced cover is perfectly tailored to the device. The covers do not increase the weight or size of the smartphones. The embossed areas for buttons and precise cutouts for ports make it easier to use the phone.

Specification
