CRP7WH

CRP7WH is a continuation and development of the highly acclaimed alarm clock radio CR7BK by the Blaupunkt brand. The device features a built-in FM tuner with digital PLL synthesis, allowing you to program 10 favorite radio stations, enabling quick access to the station you want to listen to at any given moment. The available clock has an alarm function that can be programmed for two different times and can be activated using a sound signal or your favorite radio station, making waking up a very pleasant experience. The large, white LCD display is very legible both during the day and at night. Thanks to its dimming function, it is possible to adjust the brightness level to current lighting conditions. The built-in projector allows for displaying the time on the ceiling, so you can check the time without lifting your head off the pillow. An additional, very useful feature is the adjustable projection angle and the ability to flip and display the time on the wall as well. On the back of the casing, there is a USB port used for charging all kinds of portable devices. The alarm clock radio also has a battery compartment that serves to maintain memory in case of power outages. The device is supplied with a 5V mains adapter.

Specification

Height: 87 mm
Width: 171 mm
Length: 57 mm
Speaker: built-in
Connector: USB-A (female)
Brand: Blaupunkt
