CR55CHARGE

Clockradio is a device that will help you start every day. Decide for yourself what will wake you up in the morning - a classic buzzer or maybe your favorite radio station. The CR55CHARGE model has been equipped with a radio tuner that allows you to program 20 stations in its memory. With this feature, you do not have to search all frequencies every time you turn on the radio to find your favorite. The dual alarm function will allow you to set two hours of wake-up and a nap (from 5 to 60 minutes). The clock radio also has the function of charging mobile devices. You can charge your phone or tablet with a USB cable (the cable is not included) or if your device supports Qi technology - by charging wirelessly. The current time is displayed by means of LEDs with dimming function. The clock radio is also equipped with a lower LED backlight, which makes it look very modern at night. The big advantage of the product is the sleep function, which allows the user to set the time after which the device will turn off. This is especially useful when you are listening to the radio while falling asleep.

Specification

- Height:** 80 mm
- Width:** 165 mm
- Depth:** 93 mm
- Connector:** USB-A (female)
- Additional informations:** Qi Standard
- Functions:** FM radio
