Compact radio receiver with a telescopic antenna and Bluetooth connectivity, featuring a modern design and a black casing. High qualityLTC portable radios are devices made with the utmost care, using high-quality components in their production. As a result, the product is characterized by long life, reliability, and user satisfaction that meets the needs of even the most demanding customers. Multiple power options The Sona radio provides as many as 3 power methods to ensure maximum user convenience. Thanks to this solution, you have access to information in any situation. If you are near an electrical outlet, you can power the radio with the included AC cable or through the DC 5 V socket. If you are in a place without access to electricity, the battery power option comes to the rescue. The 18650 battery with a capacity of 1200 mAh will power your radio for many hours. Bluetooth connectivity The LTC Sona is a compact device with extensive capabilities. The Bluetooth system used in the device allows for wireless connection to another device and streaming music directly to the radio. In just a few moments, you can pair your phone with the receiver and fill your surroundings with your favorite melody. Three radio bands The tuner built into the device allows for receiving waves from FM, AM, and SW bands. This means supporting traditional FM radio stations and shortwave signals, which have excellent propagation. Thanks to this functionality, you can listen not only to traditional stations broadcast in your country but potentially also to transmissions from the farthest corners of the world! Support for external devices A solid radio tuner, support for three frequency bands, and Bluetooth connectivity are the main features of the Sona radio. What if you don't want to listen to radio broadcasts and don't have any interesting songs on your phone? The built-in USB-A port, microSD card reader, and AUX in socket allow you to connect external devices in a wired way and play music directly from storage media. Telescopic antenna Every radio is as effective as its ability to receive radio waves. The LTC Sona is equipped with a telescopic antenna that significantly enhances the device's capabilities and ensures excellent reception of radio stations. The adjustment of the antenna position allows you to set it in the most favorable direction, and the ability to fold it keeps the device compact and facilitates transport. Convenient handle The Sona radio is a device with simple and modern lines. The foldable handle complements the construction of the device, making it easy to carry the radio from place to place. Convenient transport combined with the compact shape of the device means that this radio can accompany you everywhere — on a walk, at the beach, or on trips into nature.
