PR5BL

This portable device features a youthful design, which makes it an eye-catcher and certainly distinguishes its user. However, the modern look is not all the advantages of this Blaupunkt radio. This model has an FM/AM tuner, with the possibility of storing up to 50 favourite FM channels and 20 AM stations, so there is no need to search for your favourite radio station every time. The telescopic antenna and the highest quality components, with which the radio receiver is equipped, guarantee an excellent signal and reliability. The built-in 1W RMS speaker provides clear sound at optimal volume. Thanks to the mini-jack output, you can also enjoy the music using headphones. The model has a large, clear LCD display, which shows the current radio frequency and battery level. The screen matches the colour scheme of the radio. Thanks to a microSD memory card and USB memory card input, it is possible to connect an external audio source. The PR5BL is an offer for active people, who appreciate high quality and reliability of devices and want to have access to their favourite music in all circumstances.
