Portable radio is now a permanent fixture in a teenager's room, a beauty salon or a classroom. It is present wherever subtle background music is required, in a room where a small social meeting is being prepared or in a place where it is necessary to listen to CDs with training materials. High functionality and at the same time simplicity of use make these radios suitable for both children and adults. The Blaupunkt BB14BK boombox is a model equipped with a CD player with MP3 reading. This gives the user the possibility to listen to their favourite music CDs or popular audiobooks with a huge selection of books to listen to. The device also has an FM tuner with the possibility of storing as many as 40 radio stations in its memory and the whole tuning process is very easy and does not take much time. This function will certainly be appreciated by those who are in the habit of daily listening to information broadcast by their favourite radio station. BB14BK also has a USB socket for connecting any external media with MP3 files. The player will automatically decode and play the songs stored on a portable USB memory stick and allow us to quickly enjoy our favourite songs during any social meeting. Additionally, on the front part of the casing there is an AUX socket available, thanks to which it is possible to connect various other devices which have an analogue sound output. Just a simple connection and you can enjoy much better sound quality. This portable radio can be powered either from the mains or from 6 replaceable R14 batteries. This makes it suitable for use as a stationary player or as a portable entertainment source. A clear LCD display shows the frequency of the selected radio station, the track number or the current time.
