LS180

Looking for additional equipment to enhance the sound of your TV and enjoy high-quality surround sound? BLAUPUNKT's 2.2 channel LS180 soundbar will allow you to enjoy the incredible sound of movies, music and any other programs available in your home. This model is equipped with a Bluetooth module, which allows you to both connect the device to your TV, as well as to wirelessly stream music from other Bluetooth devices, such as smartphones and tablets. This allows you to listen to your favorite tunes in a completely different sound quality, as the LS180 provides unconventional sound across the frequency range. The HDMI connector used in the LS180, which has an ARC return channel, allows you to connect the soundbar to your TV and get the best quality data transfer in both directions, including control. Thus, by adjusting the volume with the TV remote control, we can simultaneously increase the volume of the soundbar. The soundbar also has a digital optical input, which can be connected to other digital devices, such as a DVD player or a DVB digital TV set-top box. The available AUX input allows you to connect any other sound sources with a suitable audio signal output. The manufacturer has also equipped the LS180 with a USB player, to which you can connect all kinds of portable USB flash drives with your favorite music recorded on them in MP3 format. On the LED display you will check information about the currently selected sound source. A remote control to operate the device remotely will complete the operating convenience. The unit has a built-in amplifier that generates a total of 100 watts of RMS power. The front speakers receive 20 watts RMS per channel, and the additional two woofers, mounted on the top panel, are powered by 30 watts RMS each. The best possible sound experience, depending on the type of sound being played, is provided by a built-in parametric equalizer, with available predefined settings such as music, movie, news, surround sound. In addition, high and low frequencies can be adjusted separately. The included wall-mounting accessories allow it to be wall-mounted, but it is also possible to place the soundbar on a cabinet in front of the TV. The LS180 soundbar is an indispensable device in a modern home or a minimalist apartment. In either case, it fills the room with intense yet high-quality sound.
