VCC301

The VCC301 from Blaupunkt was designed and created so that every user can enjoy clean floors and furniture and fresh air in their home. The high quality of the VCC301 is confirmed by its energy class A. This is the ratio between the energy consumption of the appliance and its efficiency. Class A means that the Hoover has a very high cleaning performance with low energy consumption, which translates into noticeably lower electricity costs, even with frequent vacuuming. DpuHF class A means that on a hard floor, the Hoover will collect up to 111% of the dust percentage. This value, on the most efficient models, is usually higher than 100%, as the vacuum also picks up dust from surfaces adjacent to the nozzle-brush during vacuuming. Class A performance on hard floors is the highest value among domestic models. The second rating, DpuC D, indicates the effectiveness of the machine when vacuuming carpets. VCC301 collects up to 0.83% of dust from all types of carpets and rugs with a single brush stroke, which will be particularly appreciated by people who are allergic to dust, as this is where most dirt and allergens accumulate. The quality of the VCC301 Hoover is demonstrated not only by how well it collects dust, but also by the purity of the air that comes out of the unit on the other side at the outlet. The VCC301's emission class A guarantees dust and pollen-free air in the room. The great performance of the machine is underlined by the most advanced HEPA H13 filter, which captures up to 99.97% of pollutants, including dust, bacteria, protozoa cells and fungi. By vacuuming with VCC301, you can be sure that the air coming out of the vacuum is as clean as possible and safe for you and your loved ones. The VCC301 bagless Hoover is based on a swirling movement of air, called a cyclone. Dust and dirt are separated by centrifugal force in a container into which the air is drawn, and the cleaned air is directed towards the outlet at the back of the appliance after passing through a series of filters. The 1.2-litre capacity of the dust container ensures that it does not need to be emptied frequently, while maintaining the small size of the machine. A cable reel and a 5 m long cable allow you to clean even hard-to-reach places, such as overhead areas. The possibility to park the device vertically and horizontally ensures trouble-free storage of the Hoover. With a noise level of less than 77dB, the vacuuming will not be tiring to the ears of your household members. In addition, the vacuum power adjustment on the handle allows you to adjust the suction power to the surface you are currently cleaning. An overheating protection completes the comfort of use. The Hoover comes with a range of useful accessories for thorough and convenient cleaning: a universal brush nozzle, a bristle nozzle and a crevice nozzle for narrow areas. The metal telescopic tube reduces the need to bend down and allows you to reach high places. The Blaupunkt VCC301 Hoover is a high-quality product with a modern design that appeals both to discerning users who value functionality above all else, and to aesthetes for whom practical appliances are also a nice addition to the home. Replacement accessories Replacement filter set (2 inlet filters EPA H12, 1 outlet filter HEPA H13) ACC016. We recommend replacing the inlet filter every 2-4 months and the outlet filter every 4-8 months (depending on how intensively you use the Hoover).

Specification

Volume (dB): 77 dB
Type of product: hoovers
Energy class: A
Gross weight: 4,60 kg
Height: 22,20 cm
Width: 25,20 cm
Depth: 34,20 cm
Cable length: 5 m
Power: 700 W
Input voltage: 220 - 240 V (50 - 60 Hz)
Capacity: 1,20 l
Brand: Blaupunkt
Colour: white
gray
blue
Warranty: 24 month
