The Huslog electric kettle with thermometer is an original solution for anyone looking for a stylish and functional kettle. Its elegant design makes preparing your favorite beverage quick and enjoyable. A distinctive feature of the kettle is the built-in thermometer, which shows the rising temperature while boiling water. This allows for precise preparation of tea or coffee at the right temperature. Additional functionality is provided by the water level indicator located under the handle. Main features: - Built-in thermometer – stylish vintage-inspired design that allows temperature control of the water and brewing beverages according to preferences. - Large capacity and power – 1.7 L capacity, 2200 W power. - Practical casing – made of high-quality plastic, ensuring safety and quick water preparation. - Elegant design – black matte finish with metallic accents and a glass window gives the kettle a unique appearance. - Hidden capacity scale – located under the handle, allows control of the amount of poured water without disrupting the retro style. - Fast and quiet boiling – a powerful heater reduces waiting time for a hot beverage, and the kettle operates exceptionally quietly. - Fully removable lid – convenient lid opening using the handle, making it easier to fill and clean the kettle. - Indicator light – LED signaling the operation of the device. - Safe to use – anti-slip base provides stability and comfort during use. - Rotating base – allows for quick and convenient placing of the kettle back in position. - Precise spout and filter – ensures accurate pouring of water without spilling, and the anti-limescale filter maintains water purity. - Easy maintenance – simple cleaning ensures a long lifespan of the kettle.
