Incredibly smooth and straight hair with the Huslog hair straightener! A beautiful sheen of straight hair thanks to the Huslog straightener. The straightener features a classic design that gives the device a modern and elegant look. A hair transformation possible in the comfort of your home. The innovative straightener with a display not only ensures excellent results but also gives you full control over your hair styling! Unique design and advanced technology make every use a true comfort. The precise display allows you to adjust the temperature to your individual needs, and the ergonomic design makes it easy to operate. Special features: - Elegant design – the straightener has an aesthetic and minimalist appearance, making it a pleasing accessory. - 2-in-1 functionality – the straightener can also be used as a curling iron thanks to its slim shape. Just the right positioning, and waves or curls are ready in no time! - Adjustable temperature – with temperature control, you can tailor it to your needs. The Huslog straightener offers a range from 110°C to 230°C. - LED display – an elegant display that allows you to monitor the temperature setting. - Swivel cord – comfortable use provided by the swivel cord, which also features a hanging loop. - Lock – the straightener includes a lock that allows for easy closure of the device after use. - Aesthetic buttons – three buttons located on the side of the straightener provide quick control over functions: power on, power off, and temperature adjustment. Temperature vs. hair type: - 120-140°C – fine, delicate, easily styled hair. - 150-180°C – medium thickness hair or hair subjected to hairdressing treatments. - 190-200°C – thick or wavy hair. - 210-220°C – hair that is difficult to style. - 230°C – coarse or exceptionally resistant hair to styling.
