AK-AD-03

The Akyga® AK-AD-03 adapter allows you to connect devices with a DVI 24 + 5 output with devices with an HDMI input. It is used to connect a PC graphics card with a TV set, projector, etc. The adapter is made in the DVI-I DUAL-link digital standard (double-sided). It enables the transmission of digital signals without compression and loss of sound and image quality. In the AK-AD-03 adapter, the data flow is in both directions.

Specification
