High performance and durability, secure recording The Kingston High Endurance microSD card is a high-durability card, designed for high-load data storage operations, for example in home video surveillance and security systems as well as in car and personal cameras. The card provides up to 20,000 hours * of perfectly smooth video recording and playback with Full HD 1080p quality. This means a guarantee of registering key seconds when you need it most. The microSD card has been designed to work in difficult conditions, which has been confirmed by appropriate tests. It is resistant to extreme temperatures and shocks as well as to water and X-rays. Thousands of hours of reliable recordings High performance, perfectly smooth recording Durability under harsh operating conditions Do not pay for the cloud - record and store your data at home
