

Maxlife FM transmitter Bluetooth MXFT-03 black

OEM0400391
5907457721500

The Maxlife MXTF-03 Bluetooth FM Transmitter is an excellent device for wireless music playback and making calls while driving. It allows for connection to any equipment equipped with Bluetooth functionality. The built-in microphone enables safe conversations while driving, eliminating the need to hold the phone in hand. The transmitter features music playback from various sources. You can listen to music via Bluetooth, connect a USB drive to one of the two USB ports on the transmitter, or insert a TF card into the card reader. The MXTF-03 supports popular music file formats such as MP3 and WMA, ensuring excellent sound quality. An additional advantage is the two USB-A ports with a charging power of 3.1A, allowing for the simultaneous charging of two devices.
