5900495742209

Universal bike holder Forever BH-120 is an ideal product for cyclists using smartphones. It provides easy access to the phone while riding a bike. Mounted to the handlebars of the bicycle, it stably holds the device in the right place for the user and allows free use of navigation or music player. The holder adapts perfectly to your smartphone thanks to elastic elastic bands made of durable silicone. At the same time, it provides easy access to all keys without blocking face recognition or light sensor functions. The smartphone is firmly and securely held in the holder. The adjustable mount allows you to mount the holder not only on the bike-handlebar, but also on your motorcycle, scooter or pram. Aluminium frame and strong, silicone rubber bands ensure durability of the holder. The rubber bands are gentle on the smartphone screen and do not expose it to scratches, and they also eliminate vibrations and hold the device firmly in place. The holder is dedicated for telephones with a screen diagonal of 4"-6". Suitable for models such as: Samsung, Huawei, LG, Sony, iPhone, Xiaomi and many others. Using a phone (e.g. navigation) while cycling has never been so pleasant and comfortable. Available in two colours: black and black-grey. Height up to 150 mm.
