X29

XO X29 are true wireless earbuds with Bluetooth 5.3 and a charging case. The earbuds support TWS (True Wireless Stereo) technology – both earbuds connect with each other to create a wireless stereo set. The portable case with a built-in battery, in addition to charging functionality, allows you to safely store the earbuds in your pocket, bag, or backpack. Free your hands and enjoy music, internet radio while working, walking, working out, or driving. The XO X29 TWS earbuds are an ideal solution for smartphone, computer, notebook, tablet users, and other devices that support Bluetooth technology. They are compatible with most devices running Android and iOS. The earbuds also feature a microphone, allowing you to easily conduct voice calls. The duration of calls/listening to music on a full charge is approximately 240 minutes (depending on the volume level), thanks to the use of energy-saving Bluetooth 5.3 technology.

Specification
