SMART04

Innovative Tuya WiFi socket IP66 that will provide you with power access in any weather conditions. With the Tuya app, you have full control over the socket's operation. The hermetically sealed housing guarantees high resistance to rain, dust, and other weather conditions. Main features: 1. High resistance: the socket is fully enclosed, providing excellent protection against rain and dust, ideal for outdoor applications. 2. Remote control: thanks to the remote control feature, you can monitor and control the connection from anywhere via a smartphone app. 3. High compatibility: the socket is compatible with many devices, allowing for easy integration with your existing home network. Application: Perfect for the garden, terrace, garage, and anywhere you need access to power while being protected from the elements.
