

Technoline weather station WS10WH

AGDAOTERBLA00024
5901750506031
RTVBLWS001

WS10WH weather station, which can measure the current temperature and humidity both indoors and outdoors. In addition, it has a memory function for the measurements of the highest and lowest temperature and humidity values, as well as a temperature and humidity trend indicator, which shows the fluctuation of measurement values over an hourly interval. The weather station also has a graphic weather forecast that uses pictograms to show sunny weather, partly cloudy weather, overcast weather, rain and snow. There is also a freezing point indicator, which will emit a graphic and sound signal to notify when the temperature drops below 3 degrees Celsius. The weather station also has a clock that allows you to choose a 12/24-hour format, and a 53×62 mm LCD display (without backlight) that allows you to easily read measurement results and other information. It is easy to use, can be hung or placed, and is powered by batteries. Batteries are included for both the station and the external wireless sensor, so the station can be used both indoors and outdoors.

Specification

- Working temperature:** -30 to 60°C
- Battery type:** AAA
AA
- Warranty:** 12 month
- Dimensions (mm) LxWxH:** 81 x 26 x 93 mm
- Functions:** measuring the temperature
temperature and humidity sensor
- Set contains:** 2 x AA battery
2 x AAA battery
