LXM215

The WIFI temperature and humidity sensor with a digital display is an advanced device that allows for precise measurement of temperature and humidity in your environment. Equipped with a digital screen, this sensor offers easy and intuitive operation, enabling you to quickly read the current values. The WIFI temperature and humidity sensor with a digital display is an advanced device that allows for precise measurement of temperature and humidity in your environment. Equipped with a digital screen, this sensor offers easy and intuitive operation, enabling you to quickly read the current values. Digital Screen The integrated digital screen displays temperature and humidity readings clearly, allowing you to easily track changes. WIFI Connection Thanks to the WIFI feature, the sensor can transmit recorded data to your phone via a dedicated app, enabling you to monitor conditions in real-time from anywhere. You can check the temperature and humidity from a distance away from the sensor. Wired Power Supply This sensor requires a DC 5V wired power supply, ensuring continuous operation and eliminating the need for frequent battery replacements. With this advanced WIFI temperature and humidity sensor with a digital display, you can control and maintain optimal conditions in your home, office, or any other room, providing comfort and health for yourself and your loved ones.

Specification

- Gross weight: 90 g
- Additional informations: Temperature measurement range: 0°C to 60°C
Humidity measurement range: 0% to 99%
- Wi-Fi: 2.4 GHz
- Package height: 65 mm
- Package width: 65 mm
- Package depth: 22 mm
- Colour: white
silver
- Brand: LTC
- Warranty: 24 month
