BMW Leather Stamp Blue LinesThe trendy Leather Stamp Blue Lines folio collection is signed by the renowned Bavarian automotive company BMW. BMW is one of the most exclusive car manufacturers in the world, known for luxury and excellence in every detail. These qualities have been transferred to the latest Leather Stamp Blue Lines collection.High-quality materials: Only the highest quality materials have been used to produce the case. The back of the case is made of polycarbonate (PC), reinforced with a soft-touch leather. Polycarbonate provides durability and scratch resistance, while the smooth leather adds a prestigious character to the case. The sides of the case are made of flexible polyurethane (PU), which perfectly protects the phone from impacts while ensuring easy fitting of the case to the device. Gently raised outer edges protect the phone screen from damage, and raised edges around the camera lens safeguard the optics against breakage and scratches. Functionality and style: The interior of the Leather Stamp Blue Lines case hides three practical pockets for essential documents or payment cards, allowing it to successfully replace a wallet. Additionally, the cover can be folded into a horizontal position, which is extremely useful for watching movies or browsing the internet. The case is adorned with three vertically arranged stripes that are color-coordinated with the classic BMW logo. The stitching of the colored stripes is very subtle yet gives the collection a unique elegance and sophistication. The collection is completed with a sewn metal logo of the BMW automotive company, confirming the authenticity of the product and emphasizing its style and prestige.
