WM60UDB

Blaupunkt WM60UDB – Wireless Microphone Set WM60UDB is a set of two UHF wireless microphones with a receiver equipped with a 6.3 mm jack connector, compatible with portable speakers and other audio devices. For a 3.5 mm input, the included adapter can be used. Once the receiver is connected and the microphones are turned on, the devices automatically pair. Sound Quality and Transmission The microphones offer a wide frequency response (65 Hz – 18 kHz) and clear sound. They operate in the UHF band, which ensures a stable signal even through building walls, with a maximum range of 30 m. Power Supply and User Convenience The microphones are powered by AA batteries (up to 3 hours of operation), while the receiver has a 1200 mAh battery (up to 7 hours) charged via micro USB. Both microphones support 16 UHF channels and automatically switch frequencies when encountering interference. Ergonomics Lightweight (155 g) and comfortable to use, the microphones are made of high-quality materials. They feature a sliding power switch, a display, and a protective mesh and foam head. WM60UDB is an ideal addition to Blaupunkt PA and MB speakers, as well as other audio devices.

Specification

Accumulator capacity: 1 200 mAh
Connector: 6,3 mm (jack) (male)
Signal-to-noise ratio (SNR): 85 dB
frequency response: 65 Hz - 18 kHz
Brand: Blaupunkt
Colour: gray
Battery operating time: 3 h.
Warranty: 24 month
