Tempered glass 2.5D with a hardness of 9H effectively protects the phone screen from damage. It provides full image clarity and resistance to fingerprints and dirt thanks to the oleophobic coating. The glass is extremely thin (only 0.3 mm thick), which allows for maintaining full sensitivity of the touch screen after application. The adhesive on the entire surface eliminates the risk of dust and dirt accumulation under the glass, and the rounded edges enhance comfort and safety during use. The product is dedicated exclusively to phones with flat screens.
