The Anti Shock MagSafe cover is an aesthetic high-quality product. The entire Anti Shock series is characterized by reinforced corners and increased thickness of up to 1.5 mm. The TPU material used and the thickness of the cover guarantee greater protection for the phone against shocks and scratches. The cover is fully transparent. An additional rough inner layer prevents moisture buildup and the cover from sticking to the smartphone casing. Anti Shock products have cutouts for all ports and embossed spots for buttons. - The cover minimally increases the size of the smartphone. - It can be successfully used in car mounts. - It allows for wireless charging of the phone with a MagSafe charger. We remind you that a natural property of TPU (thermoplastic polyurethane) is the darkening process. This occurs after prolonged use or contact with dyes. Significant exposure to sunlight also causes discoloration.
