Karl Lagerfeld is a unique and avant-garde series of cases that will turn your phone into a stylish accessory for the everyday outfit of any user. Each case in this collection is made with great attention to detail from the highest quality materials. The back of each case is made of polycarbonate (PC), which provides durability and scratch resistance, while the sides of the case are made of flexible polyurethane (PU), which perfectly protects the phone from impacts while ensuring an easy fit for the case to the phone. Gently raised outer edges protect the phone's screen from damage, while the raised outer edges around the camera lens protect the optics from breaking or scratching. The stylish protective case is designed to safeguard the device while giving it a fashionable look.
