Spigen Ultra Hybrid is a case that combines the best features of protection and aesthetics, providing your smartphone with both safety and an exceptional look. Thanks to its unique hybrid construction (TPU + PC), which combines a durable frame with a transparent panel. Your phone maintains its original design while being effectively protected against damage. Reinforced corners with Air Cushion technology effectively absorb shocks, providing additional protection against drops. Slightly raised edges around the screen and camera protect these elements from direct contact with flat surfaces, while precisely crafted cutouts allow easy access to all ports, buttons, and functions of the device. Spigen Ultra Hybrid is an excellent choice for those who want to secure their phone without obscuring its natural beauty.
