Tempered glass with a revolutionary method of installation - if you have been scared by this aspect with the use of tempered glass so far, your problems have just been solved! The tempered glass from the "EZ Fit" series from Spigen has been secured with a mounting frame cut perfectly to the front of the phone, thanks to which you can perfectly position it on the screen. The manufacturer has simplified the assembly method to such an extent that it is fully intuitive for every user. Privacy glass is a thin coating that has been hardened to a hardness of 9H during the production and tempering process. This makes it scratch-resistant even in contact with objects that are sharp as keys or a knife. The glass is covered with an oleophobic and hydrophobic layer that prevents fingerprints or other impurities on the screen. It is crystal clear and perfectly reflects the displayed colors. It also has no effect on touch sensitivity and has exceptional smoothness, making it a pleasure to guide your finger on the screen. Its additional function is to protect privacy - the glass at a certain angle blocks the light that the display emits, thanks to which an effect similar to that of ATMs has been achieved. The glass is dedicated in particular to protect the screen from scratches and minimizes the risk of damage to the screen during an unexpected fall.

Specification

- Brand:** Spigen
- Complies with:** Phones / smartphones/Apple/iPhone 13
Phones / smartphones/Apple/iPhone 13 Pro
Phones / smartphones/Apple/iPhone 14
Phones / smartphones/Apple/iPhone 16e
