Buy now

Tempered glass with a high hardness of 9H perfectly protects the phone screen. It ensures image clarity, and the oleophobic coating provides resistance to fingerprints and dirt. The glass is thin and durable, with a thickness of only 0.3 mm. After application, the phone retains its touch properties. The adhesive covers the entire surface, preventing dust and dirt from accumulating under the glass. The edges of the glass are rounded, ensuring safe use. The product is intended solely for phones with a flat screen.
