

BWOO Dashboard car holder BO-ZJ125 ABS+silicon+aluminum

GSM183286
6933654808859
BO-ZJ125

It features a built-in control button that allows one-handed operation without distracting attention while driving. Thanks to the 360-degree rotating ball head and the long extendable telescopic arm, it can be adjusted to your preferred angle, enabling easy and safe checking of messages or navigation while driving. The strong grips can hold the phone securely in place without movement. The smart triangular automatic locking system makes phone mounting more stable. Silicone pads are also included to prevent the phone from slipping out of the holder without causing any damage to the device. The enhanced suction cup offers adhesion strength sufficient to withstand a 20-pound adhesion test, ensuring stable placement on the dashboard. Press the reinforcement element to maximize adhesion strength and ensure that the holder will not shake, even when driving on uneven mountain roads. Universal for all phones with a diagonal size from 4.7 to 6.7 inches, this car mount is suitable for all types of vehicles.

Specification

Packages type: box
Brand: BWOO
Colour: black
Place of installation: on dashboard
