OEM102044	Xiaomi Redmi Note 12 Pro 4G

Premium 2.5D glass is a reliable protection for your phone's screen. Created with quality and convenience in mind, it provides comprehensive protection and exceptional benefits.

The glass has a special anti-oil layer that effectively picks up oils and grease from your fingers, leaving your screen clean and streak-free. The Asahu glass used, known for its excellent quality and durability, provides maximum protection against screen damage. The AB Glue layer used ensures easy application and eliminates air bubbles for a perfect fit.

With a surface hardness of 9H, the glass is highly scratch resistant. It has a 3D curvature that provides a perfect fit to the screen, maintaining high transparency. Additional oleophobic coating prevents the accumulation of fingerprints and dirt, making it always look fresh and clean.

The screen responds to touch in a responsive and precise manner, providing a comfortable user experience.

## ATTRIBUTES
