OW-3912

The multifunctional Huslog lamp will certainly come in handy during remote work and learning. The adjustable tilt angle allows for precise customization to individual needs. The desk lamp is equipped with a clear LCD display that shows the date, time, and temperature. The display also works in night mode – you can turn off the backlight without having to unplug the lamp. It features a built-in wireless charger in the phone base. Three light colors to choose from and as many as five brightness adjustments provide optimal lighting. The lamp is perfect for illuminating the entire desk as well as for a precisely directed beam of light, for example, for manual work. Main features: - Multifunctional – ideal for work and relaxation - Perfect for studying and remote work - Three light colors: warm, cool, and intermediate - Five brightness levels – customizable to preferences - LCD display showing time, date, and temperature - Ability to turn off display backlighting – night mode - Foldable to compact size – easily fits in a desk drawer or cabinet - Adjustable tilt angle of the arm - Rotating upper part (light source) Built-in wireless charger: - Wired and inductive charging options via the built-in USB port and inductive loop- The device being charged must meet the requirements for inductive charging - Inductive charging works only when the lamp is plugged into power - Before using inductive charging, check if your phone supports this technology and remove it from the case Additional features: - Minimalist design – takes up little space - Lightweight and easy to carry – ideal for taking in a backpack to work - Power adapter included

Specification

Type of product: lamp

Light Color: 3000K
4500 K
6500 K

Additional informations: induction charging

Output voltage: 5 V

Colour: black

Warranty: 12 month

Lumens number: 400 lm

Battery type: CR2032

Input voltage: 12 V

Brand: Huslog

Material: PC
