Retro LED Kerosene Lamp Blue FLR-35, inspired by the design of old gas lanterns, serves as both a light source and a decorative element in your interior, catching the eye and giving the room a unique character. The stepless dimming allows for precise adjustment of the light intensity, creating the perfect atmosphere – from cozy to more vibrant. The built-in battery with a capacity of 2x2000mAh ensures long hours of operation on a single charge, which is particularly practical in places with limited access to outlets. Charging via the USB-C port makes the powering process quick and convenient, eliminating the need for traditional cables. The filament bulb emphasizes the retro character of the lamp, emitting a warm, pleasant light that promotes relaxation and creates a cozy atmosphere. The lamp is energy-efficient, making it an eco-friendly product that does not burden the household budget. It is perfect for the living room, bedroom, or office. Instructions
