Flexible LED strip is one of the most versatile LED modules. Its wide range of applications and ease of installation allow for virtually limitless possibilities. Its miniature dimensions enable the LED strip to be inserted almost anywhere. The LED strip is backed with double-sided adhesive tape, allowing it to be mounted on many surfaces, even directly on the wall. The product is designed for use both indoors and outdoors, thanks to its high water resistance. Product features: - Brand new, high-quality LED strip for illuminating and decorating all kinds of objects and items- Due to the use of a 12V DC voltage, the strip can also be used in cars- Possibility of spectacularly illuminating advertisements, creating glowing signs, etc. - LED diodes placed on a flexible self-adhesive strip, which facilitates installation Applications: - Advertising – illuminated signs, three-dimensional letters, messages, logos, and other informational elements made as three-dimensional shapes illuminated from within by LED diodes. LED lighting provides a bright and even light surface, which is an attractive alternative to neon lights and fluorescent lamps - Car – interior tuning - Lighting for emergency exits and symbols that facilitate orientation - Safety lighting - Decorative lighting – cornices, recesses, facets, stairs, mirrors, furniture, glass countertops - Furniture lighting – installation under cabinets and shelves
