

Maxlife english learning device MXLD-100 blue

OEM0200499
5900495097439

The interactive, electronic card reader for learning English is a great way to awaken children's curiosity about the world and desire to learn English. The toy not only provides entertainment, but also educates, integrating learning with play, which is a very effective method of learning, especially for younger children. Through this form of play, the child develops memory and concentration, and promotes logical thinking and creativity. The toy is simple and intuitive, which makes it easy for even the youngest children to use. Sound playback of English words after inserting the corresponding card allows children to learn pronunciation by listening. The set contains 112 cards with pictures and English words. The cards are divided into 12 categories, such as animals, colors, vegetables and more. The reader automatically turns off if not used for a long time. It is designed for children from 3 years old. The interactive electronic card reader for learning English provides an interesting and effective learning method for children. The combination of vocabulary learning, pronunciation and fun makes children eager to use such a toy, which will support their enthusiasm to learn English from an early age.
