Maxlife portable game PopIt MXPS-100 is a skill game that allows you to exercise memory and concentration. Equipped with four game modes and 999 levels, it provides relaxing and stress-relieving entertainment for the youngest. The game involves pressing bubbles at the right moment, which develops imagination, creativity, as well as concentration and dexterity skills. It offers various sensory experiences through button pressing, and sound and light effects further engage children. The game features cheerful sound effects in the form of songs and spoken words in English. The illuminated buttons attract the attention of little ones, providing them with amazing experiences. The console is characterized by vibrant colors and a charming design. The console offers four game modes: Speed mode - 120 levels, where bubbles must be pressed faster and faster. Memory mode - remembering and reproducing sequences of randomly glowing bubbles. Scoring mode - earning points by pressing glowing bubbles. Multiplayer mode - competing with a second player.
