Maxlife Bluetooth selfie stick tripod MXST-100 black

OEM0101354 5907457751729

The MXST-100 Maxlife selfie stick with Bluetooth functionality and a tripod is an indispensable gadget, perfect for taking photos and recording videos. It is compatible with most phones available on the market, both iOS and Android. With its lightweight and compact design, it is easy to carry – it fits into a handbag, pocket, or backpack. Simple operation is made possible by the telescopic handle, which extends to a length of 66 cm. The wireless remote allows for remote photo taking via Bluetooth, enabling control of the camera from a distance. This makes the product quickly and conveniently connect to the smartphone wirelessly, eliminating the need for additional cables. The arm span of the selfie stick is suitable for phones with a width of 6.4 to 8.7 cm. The selfie stick is equipped with three arms that serve as a tripod. They provide stability when taking photos or recording videos. A 360° rotation allows for adjusting the holder to the right position and taking pictures from various perspectives. The MXST-100 selfie stick with Bluetooth functionality and a tripod is the perfect solution for travelers, photography enthusiasts, and anyone looking to capture moments in a simple and convenient way.
